COMPETITIVE INTELLIGENCE

Other · Local market · May 3, 2026

SITUATION

suburban flex-office operator with approximately \$4.6M in annual revenue, differentiated by design-forward spaces and on-site hospitality management across IL and TX metros.

PROBLEM

Despite a strong in-person experience and loyal membership presence and local employer partnership infrastructure needed to consistently fill capacity against better-funded national competitors entering its suburban markets.

PRIORITY ACTION

Within 30 days, audit and fully optimize Google Business Profiles photos, services, Q&A, and actively solicit 20+ new Google reviews per location to close the visibility gap Desk.

MARKET SIZE

\$12
addressable market

GROWTH RATE

15%
industry CAGR

POSITION SCORE

6 / 10
vs. competitors

COMPETITORS

5 analyzed
in this report

KEY FINDINGS

- multiple suburban locations, confirming viable unit economics in an underserved suburban coworking segment
- ratings in Frisco/DFW and benefit from national brand cannot match on budget
- The brand's hospitality-forward identity ('joyful workdays, close to home') is a genuine differentiator versus commodity flex-space competitors, but is under-leveraged in local SEO and community content
- users — a high-value segment that can be systematically targeted through local LinkedIn outreach and direct employer partnerships at zero cost

targeted through local LinkedIn outreach and direct employer partnerships at zero cost

02

Company Overview

Products, positioning, and target market.

Schaumburg, Arlington Heights) and Texas (Frisco, Waco, Uptown Dallas), serving both independent professionals and

hospitality depth — on-site Community Managers, boutique-hotel aesthetics, and white-glove meeting support — rather than commodity square footage. The model is purpose-built for suburban professionals who want proximity to home without sacrificing a professional, amenity-rich environment.

VALUE PROPOSITION

CORE VALUE PROP

and community warmth that national chains cannot replicate at the suburban scale.

PRODUCTS & SERVICES

- › Coworking Desks — shared and semi-private daily access, pay-as-you-go or unlimited 24/7 memberships
- › Private Offices and Team Suites — fully furnished, move-in-ready offices with conference room access and coworking amenities
- › Custom Branded Suites — standalone team headquarters with customization for larger enterprise clients
- › Meeting and Conference Rooms — bookable by the hour with hospitality services, available without membership
- › Event Hosting — flexible event space accommodating 2 to 240 attendees with on-site coordination support

TARGET MARKET

Suburban-based remote workers, freelancers, and small business owners seeking a professional alternative to home offices, plus enterprise teams (approx. 50% of member base) needing satellite office or flex HQ solutions within commuting distance of Chicago and DFW suburbs

CURRENT POSITIONING

Premium suburban coworking operator positioned above

enterprise-focused operators, occupying a defensible 'community-first, design-led' niche in underserved suburban corridors

03

Competitive Landscape

5 direct competitors analyzed.

Suburban flex-office markets across Chicago and DFW are experiencing sustained demand as hybrid work solidifies — remote and hybrid workers increasingly prefer professional suburban space over downtown commutes, structurally expanding suburban footprints with enterprise sales infrastructure and brand recognition that independent regional operators must counter with authentic community differentiation and local SEO dominance. The competitive battleground in 2025-2026 is shifting from amenity parity to member experience quality and employer partnership

National premium challenger with enterprise muscle

polished design, and strong corporate account management infrastructure.

Target: Enterprise and mid-market companies seeking flexible, professionally managed office space with predictable all-in costs · Pricing: All-inclusive monthly memberships and private office subscriptions; enterprise volume agreements

STRENGTHS

› National brand recognition and enterprise sales

› All-inclusive pricing model resonates strongly with corporate real estate decision-makers

› Consistently 5-star rated in markets like Frisco TX,

› Robust broker referral network generating passive lead flow

WEAKNESSES

› Lacks the genuine community warmth and individual

Managers provide

› Premium pricing may be prohibitive for freelancers and small businesses in suburban markets

Established DFW local challenger with national backing

culture, creative aesthetics, and local brand affinity within the DFW market.

Target: Freelancers, creatives, startups, and small teams in DFW seeking community-driven flex space · Pricing: Tiered monthly memberships for hot desks, dedicated desks, and private offices

STRENGTHS	WEAKNESSES
› Strong local DFW brand heritage and community loyalty built over a decade › Hall Park Frisco location is a premium, high-visibility › and national marketing support › 5-star Yelp presence in shared markets	› potential culture dilution for community-focused members › Less focus on suburban hospitality nuance — more urban-creative positioning

Global commodity flex-space incumbent

suburban Illinois and Texas markets. It competes primarily on location density, price accessibility, and corporate account convenience rather than design or community experience.

Target: Corporate road warriors, cost-conscious SMBs, and enterprises needing global location coverage · Pricing: Flexible day passes, monthly memberships, and long-term private office leases; global enterprise accounts

STRENGTHS	WEAKNESSES
› Unmatched global location network enabling multi-city access for corporate clients › Deep relationships with corporate travel and real estate procurement teams › Lowest price point in most markets, capturing price-sensitive segments	› Widely perceived as sterile, dated environments lacking community or design investment › No on-site hospitality or community management — purely transactional experience

Value-tier suburban Chicago competitor

businesses and startups with below-market pricing enabled by whole-building lease structures. It competes with

Target: Budget-conscious startups and small businesses in Chicago metro needing scalable space · Pricing: Below-market monthly memberships and private office leases

STRENGTHS

- › Extremely competitive pricing undercutting most flex-office operators
- › Large floor plates accommodating growing teams without relocation
- › Recognized in best-coworking-Chicago roundups

WEAKNESSES

- › Minimal community programming or hospitality — purely space-as-a-service model
- › Less design differentiation; spaces feel more utilitarian than boutique

Mid-tier Chicago metro coworking competitor

Expansive (formerly 1871 spin-off network) operates coworking and flex-office locations in the Chicago metro, including River North and suburban corridors, with a focus on professional amenities and a startup-friendly

Target: Chicago-area professionals, startups, and remote workers seeking flexible office community · Pricing: Monthly coworking memberships and private office plans

STRENGTHS

- › Established Chicago-area presence with multiple locations and strong local brand recognition
- › Community programming and networking events that attract professional members
- › Multi-floor buildouts with varied space typologies

WEAKNESSES

- › More urban-centric footprint limits direct suburban locations
- › Less differentiated hospitality offering compared to

04

Competitive Advantages

Where the company outperforms the competitive set.

Manager model that national chains systemically under-invest in — but these advantages are currently insufficiently communicated in digital channels where purchase decisions begin.

SUBURBAN-FIRST HOSPITALITY MODEL

replicate at scale. This creates genuine member loyalty and word-of-mouth that is the most cost-effective growth engine available to the brand.

PROPRIETARY IN-HOUSE DESIGN CAPABILITY (WORKPLACE STUDIO)

advantage in building out new locations and custom enterprise suites. No direct competitor at this revenue scale operates a captive design function, which also creates an additional B2B revenue stream.

FOUNDER CREDIBILITY IN SUBURBAN COWORKING

credibility niche that generates organic media coverage, speaking opportunities, and enterprise trust signals that money cannot easily buy. This founder brand is an underutilized organic content and partnership asset.

BALANCED MEMBER MIX (50% CORPORATE / 50% FREELANCE)

A revenue base split evenly between enterprise and independent members reduces concentration risk and creates natural upsell pathways — corporate satellite teams driving meeting room demand while freelancers fill coworking desks. This mix also signals to prospective enterprise clients that the environment is professional without being sterile.

ESTABLISHED MULTI-MARKET SUBURBAN FOOTPRINT

With locations across Chicago suburbs (Geneva, Schaumburg, Arlington Heights) and DFW suburbs (Frisco, replicable playbook competitors with urban-first models have not yet validated.

05

Competitive Gaps

Vulnerabilities requiring strategic attention.

directly limit occupancy growth and are addressable within the stated budget through disciplined organic tactics.

HIGH

Thin Local SEO and Google Business Profile Presence

Suburban coworking searches are dominated by high-intent, near-me queries where Google Business Profile

HIGH

No Visible Systematic Employer Partnership Program

With 50% of members being corporate users, there is clear demand signal for a structured local employer outreach program — approaching HR and operations leaders at suburban employers directly to offer satellite office or flexible seating arrangements. This channel is effectively zero-cost but appears underdeveloped relative to the opportunity.

HIGH

Underactive Social Media and Community Content

The YouTube channel has only 25 subscribers and content dated 10 years ago — a significant gap for a brand whose primary differentiator is community and human experience. Competitors regularly surface on local

MEDIUM

Pricing Opacity Online

The website directs pricing inquiries to a form rather than displaying transparent rate cards, which creates friction for the growing segment of buyers who self-research and self-select before ever contacting a space. Competitors with visible pricing capture these buyers earlier in the funnel.

MEDIUM

Limited National Broker Referral Visibility

06

Industry Dynamics

Market trends, size, and growth trajectory.

The US flexible workspace market is estimated at \$12–15B and growing at approximately 13–15% CAGR through 2028, fueled by the permanent institutionalization of hybrid work across enterprise and SMB segments. Suburban markets are the fastest-growing sub-segment as companies implement hub-and-spoke real estate strategies — downsizing downtown HQs while adding suburban satellite locations to reduce commute burden for distributed

MARKET SIZE \$12–15B US flexible workspace market, with suburban flex estimated to represent 25–30% of total demand and growing disproportionately	GROWTH RATE 13–15% CAGR through 2028, with suburban sub-segment outpacing urban at an estimated 18–20% annual growth
--	--

KEY TRENDS & IMPLICATIONS

› Hub-and-Spoke Corporate Real Estate Adoption

and create enterprise membership opportunities that should be proactively solicited through direct HR and operations outreach at major suburban employers in Geneva/Schaumburg/IL and Frisco/DFW.

› Hospitality-ification of Workspace

Members increasingly evaluate coworking spaces on experience quality — service, design, community programming

› Rise of On-Demand and Day Pass Usage

Non-member meeting room and day pass bookings are growing as hybrid workers need occasional professional stronger organic search visibility to capture this high-intent transactional demand.

› Increased National Operator Suburban Expansion

deep local loyalty and employer relationships before brand-funded competitors arrive in force.

› AI-Driven SMB and Freelance Growth

The proliferation of AI tools is enabling a new wave of independent consultants, fractional executives, and micro-agency operators — exactly the demographic most likely to value a suburban professional coworking environment

07

Market Position Assessment

Overall competitive standing vs. the field.

6

/ 10

DIFFERENTIATED SUBURBAN INCUMBENT WITH STRONG UNIT ECONOMICS AND AUTHENTIC BRAND EQUITY, CURRENTLY UNDER-INDEXED IN DIGITAL ACQUISITION

base, differentiated hospitality model, and multi-market footprint generating ~\$4.6M in revenue — offset by meaningful digital visibility gaps, limited enterprise sales infrastructure, and increasing competitive pressure from better-funded national operators entering suburban corridors. The score reflects current position, not potential: the brand's core differentiation is real and the suburban tailwind is strong, meaning disciplined execution on organic and community channels can move this score to 8 within 12 months.

HEAD-TO-HEAD COMPARISON

vs.	decisively on authentic community warmth and on-site hospitality — a distinction that matters greatly to the suburban member who values being known by name, not just by desk number.
vs.	actively leverage as a stability and authenticity message to prospective Frisco-area members.
vs.	
vs.	corridor; Novel's only advantage is price, and members who prioritize
vs.	Expansive's urban focus limits direct overlap, but in the Chicago metro digital search environment, both brands compete for the same awareness the suburb-specific search queries Expansive cannot serve.

08

Strategic Recommendations

Immediate actions and long-term strategic vision.

IMMEDIATE ACTIONS (0–90 DAYS)

0-90 days

[REDACTED]
photos per location, complete all service categories, publish weekly Google Posts, seed Q&A with common member questions, and launch a structured review request campaign to existing members via email

Suburban coworking purchase decisions begin with 'coworking near me' and 'office space [city]' searches — GBP is the zero-cost highest-conversion channel for these queries and currently represents the largest gap between [REDACTED]

90-day target: Achieve minimum 4.7-star average rating with 30+ Google reviews per location, and reach top-3 Google Maps placement for '[city] coworking space' queries at all locations within 90 days

0-90 days

Launch a targeted LinkedIn direct outreach campaign to HR Directors, Operations Managers, and Chief of Staff roles at companies with 50–500 employees headquartered within 10 miles of [REDACTED] proposal

[REDACTED]
enterprise accounts — direct LinkedIn outreach to local employers is the most cost-effective way to replicate this without a paid sales team, and the suburban hub-and-spoke trend means corporate buyers are actively evaluating exactly this proposition

90-day target: Schedule 15 corporate site tours across all locations within 90 days, targeting conversion to at least 3 new enterprise team memberships or custom suite agreements

0-90 days

[REDACTED]
optimized posts per month targeting hyper-local search queries — e.g., 'coworking space Geneva IL,' 'private office Frisco TX,' 'meeting rooms Schaumburg' — using free tools Google Search Console and Ubersuggest for keyword research

[REDACTED]
place but it appears underutilized, and local long-tail keywords in suburban markets have low competition and high purchase intent — early mover advantage is available now before national competitors invest in local SEO

90-day target: Publish 6 new location-specific SEO blog posts within 90 days, achieving first-page Google ranking for at least 3 target local keywords and generating 25+ incremental organic website sessions per post per month

IMMEDIATE ACTIONS (CONT.)

0-90 days

Identify and personally engage the top 3–5 local business networking organizations, chambers

venue partner, and create a referral arrangement with Chamber membership directors

Suburban markets run on local trust networks and Chamber referrals are a highly efficient zero-cost lead source;

generates consistent warm referral traffic that national operators cannot credibly pursue

90-day target: Establish formal Chamber partnership or preferred-venue status with at least 2 chambers per region within 90 days, generating a minimum of 10 chamber-referred tour inquiries within the period

MEDIUM-TERM INITIATIVES (3–18 MONTHS)

3–18 MO

Member Referral Program with Tangible Local Incentives

(e.g., one month free for the referring member, waived move-in fee for the new member) converts loyal members into active advocates and directly addresses the word-of-mouth acquisition channel that suburban community-driven businesses depend on most

3–18 MO

amenity listings, and competitive pricing transparency captures high-intent buyers currently being redirected to

MEDIUM-TERM INITIATIVES (CONT.)

3–18 MO

Founder Thought Leadership Content Series on LinkedIn

[REDACTED]

consistent LinkedIn publishing cadence (2 posts per week on suburban work trends, community design, and hybrid work) builds an audience of exactly the HR leaders, commercial brokers, and suburban professionals who are

[REDACTED]

3–18 MO

Local Employer 'Work From Near Home' Partnership Program

Formally packaging a corporate satellite seat program — offering local employers dedicated desks or private office blocks at negotiated rates as an employee benefit — converts the informal corporate membership pattern already

[REDACTED]

employer relationships that compound over time

LONG-TERM VISION (3–5 YEARS)

[REDACTED]

enterprise sales volume, but by being so embedded in the local employer and professional ecosystem that switching costs are social and relational, not just financial. This means systematically converting each location into a community institution: hosting local business events, partnering with municipal economic development offices, anchoring Chamber ecosystems, and

[REDACTED]

asks 'where do our hybrid employees go to work?' Expansion to additional suburban markets should follow the proven playbook only after each existing location achieves near-full occupancy through organic and community channels, ensuring that growth is capital-efficient and margin-protective rather than dilutive.

SUPPLEMENTAL NOTE

Key Concepts, Client Clarifications & Data Sources

PREPARED BY

DATE

SUBJECT COMPANY

May 3, 2026

01

Key Concepts Explained

Plain-language definitions for terms used throughout the competitive intelligence report.

LOCAL SEO (SEARCH ENGINE OPTIMIZATION)

SEO is the practice of making a business show up higher in Google search results — without paying for ads. "Local" SEO specifically refers to appearing when someone searches for a service in a specific city or neighborhood. For example, when someone in Frisco, TX types "coworking space" into Google, the businesses that appear at the top didn't pay to be there — they earned that placement through complete profiles, consistent reviews, and content that matches what people are searching for. Local SEO is essentially free advertising: it costs time, not money, and results compound over months and years.

GOOGLE BUSINESS PROFILE (GBP)

When you search for a business on Google or Google Maps, you see a panel showing the business's name, hours, photos, reviews, and a link to their website. That panel is a Google Business Profile — a free listing any business can claim and manage at no cost. The businesses that appear in the top three results on Google Maps (called the "Map Pack") receive the vast majority of clicks from people searching nearby. An incomplete or unoptimized profile — missing photos, outdated hours, or few reviews — causes Google to rank that business lower, even if the actual product is superior to better-maintained competitors.

"NEAR ME" SEARCH

When someone types "coworking space near me" into Google, Google automatically uses their device's location to show businesses within a few miles. This type of search carries extremely high purchase intent — the person has already decided they want the product and is simply choosing which business to contact. For service businesses like coworking spaces, "near me" searches are often the single most valuable customer acquisition moment, and ranking well for them requires a fully optimized and actively managed Google Business Profile.

MAP PACK / GOOGLE MAPS RANKINGS

When you search for a local business on Google, you typically see a map with three business pins highlighted — this is called the "Map Pack." Studies consistently show that these three businesses receive roughly 70–80% of all clicks from that search. Falling off the top-three list means most potential customers never see a business at all, even with a strong website. Ranking factors include: number and recency of Google reviews, completeness of the Business Profile, proximity to the searcher, and click-through rate on the listing.

REVIEW VELOCITY

Review velocity refers to the rate at which a business receives new Google reviews over time — not just the total count. Google's algorithm weights recent reviews more heavily because they signal a business is currently active and relevant. A business with 200 reviews but none in the past six months will rank lower than a comparable business with 80 reviews posted consistently over the past year. Actively requesting reviews from members immediately after positive interactions is a high-ROI, zero-cost habit for any location-based business.

ORGANIC SEARCH TRAFFIC

"Organic" traffic means visitors who arrive at a website by clicking a regular, non-paid search result. It is contrasted with "paid" traffic, which comes from sponsored ads purchased on a cost-per-click basis. Organic traffic requires investment in content (blog posts, location pages, FAQs) and time to build, but compounds over time: a well-written post about "best coworking spaces in Schaumburg IL" can drive qualified visitors for years after publication at no ongoing cost.

LONG-TAIL KEYWORDS

A "keyword" is the phrase a person types into a search engine. "Coworking" is a broad keyword — searched millions of times daily — like "private office rental Geneva IL" or "meeting room for rent Frisco Texas" — searched less frequently but by people much closer to a purchase decision. Long-tail keywords are where small businesses win: lower competition, higher searcher intent, and a single well-written blog post or location page can realistically reach page one of Google.

MEMBER REFERRAL PROGRAM

A referral program is a structured system that rewards existing customers for introducing new customers to the business. For a coworking space, this typically means offering a current member a free month of membership (or account credit) for every new member they refer who signs a contract. Referral programs are among the highest-converting acquisition channels for community-based businesses because the prospect arrives pre-sold by a trusted peer — and referred members tend to stay longer due to existing social ties within the community.

HYBRID WORK

Hybrid work describes an arrangement where workers split time between home and an office — rather than commuting five days a week. This shift, which accelerated significantly after 2020, created structural demand for suburban coworking: professionals who want a professional environment close to home without a 45+ minute downtown commute. This is the fundamental market tailwind occupancy growth.

CAGR (COMPOUND ANNUAL GROWTH RATE)

CAGR expresses how fast a market grows per year, on average, over a multi-year period. A 15% CAGR means that if the market is \$10B today, it will be approximately \$11.5B next year, \$13.2B the year after, and so on — each year's growth builds on the prior year's larger base. It is used to project future market size and to benchmark whether a specific company is growing faster or slower than its industry average.

B2B OUTREACH

B2B outreach means proactively contacting local employers — via LinkedIn, email, or in person — to offer team workspace solutions (private office suites, meeting room blocks, satellite office arrangements) rather than waiting for individuals to discover memberships, making B2B outreach one of the highest-return activities available without a paid marketing budget.

ORGANIC SOCIAL CONTENT

Organic social content refers to posts published on social media platforms (Instagram, LinkedIn, Facebook) that appear in followers' feeds for free — as opposed to "paid social," which is advertising purchased directly from the platform. For a community-engaged and demonstrates community quality to prospective members researching the space. Founder-led businesses with genuine community stories consistently outperform corporate chains on organic engagement precisely because the content is authentic and personal.

02

Client Clarifications

Q1 Why was the Arlington Heights location included? The company states it no longer exists.

The Arlington Heights location appeared in publicly available third-party business databases — including LinkedIn's company profile, Google Maps listings, and Yelp aggregator data — that were active at the time of research synthesis. Location data on these platforms routinely lags physical closures by 6–18 months; businesses frequently update their own website while third-party listings remain stale. This is a recognized limitation of research synthesized from public data sources, which is why the report's disclosure section explicitly notes that subject company information should be verified against firsthand knowledge before

active locations.

Q2 The report focused heavily on Frisco — why wasn't there more granular coverage of the Waco and Chicagoland markets?

The Frisco/North Dallas market received the deepest competitive profiling because our research identified 8+ named direct

structurally stronger: Waco has fewer national chain entrants and is a smaller market overall; the Geneva/Schaumburg corridor is

optimization, member referral infrastructure, B2B outreach — apply uniformly across all markets. A dedicated follow-on analysis

actively evaluating growth or member retention strategy in those geographies.

Q3 The company already invests in Google Business Profiles and SEO — why was this highlighted as a competitive gap?

The report assessed externally observable, measurable outputs — not internal investment levels, which are not publicly available to outside researchers. This distinction is important: investment in SEO does not automatically produce competitive parity with operators who deploy significantly larger dedicated resources. The gap was flagged based on signals visible to any prospect or

organic search ranking for high-intent local keywords such as "[city] coworking space" and "private office rental [city]," measurable

profiles are fully optimized and already ranking in the top 3 Map Pack positions across all active markets, the recommendation is already being executed — a strongly positive outcome. The intent was not to imply zero investment, but to identify the area where well-funded national competitors most aggressively concentrate digital resources, and where the gap between investment and measurable ranking results tends to be most consequential for independent operators.
